#### Significant Events

No significant events for this reporting period

#### Field Operations

**Activity:** Broken Arrow Mercury Cleanup

**Location:** Broken Arrow OK

**Contact:** Eric Delgado

**Start Date:** 2017/01/12      **Type:** Emergency      **Status:** Active  
Response

**Comments:** EPA continued to screen the home and all concentrations were < 1.0 µg/m3. EPA conducted air sampling overnight on 10 January 2017 to confirm that the home is safe for residential occupation. Air samples will be analyzed with a 24-hour turn-around and results are expected on 13 January 2017.

---

**Activity:** Amarillo Aluminum Phosphide Incident

**Location:** Amarillo TX

**Contact:** Jhana Enders

**Start Date:** 2017/01/12      **Type:** Emergency      **Status:** Active  
Response

**Comments:** EPA Multi Media Division is hosting coordination calls to share situational awareness and coordinate future public information releases. The next call is scheduled for Thursday.

EPA continues to support the local and state response efforts within unified command.

The local health department has requested 7 cumulative days of air monitoring with Non Detect results prior to confirmatory sampling.

EPA, TCEQ and ATSDR is providing technical assistance to health agencies to determine re habitation plans. The local health authority will make final determination if home is safe for re habitation.

The locals have secured the property preventing the public from having access.

TCEQ and EPA continue cleanup. Spent aluminum phosphide has been secured and is being deactivated on the property.

EPA has mobilized a mobile command post to support in the ongoing TCEQ/EPA operations.
